

BRITMILK

Milkmade2000

The **MILKMADE 2000** is a totally automatic calf, lamb or kid feeding machine for ad-lib systems using milk powder.

The machine mixes the powdered milk substitute and water in desired proportion and temperature in batches. When the milk level falls below the pressure probe the feeder mixes a new batch

The milk replacer flow is always constant however the concentration of the mix can be regulated as the water flow to the mixing-bowl is adjustable.

- ❖ Feeds up to 60 calves or 150 lambs
- ❖ Simple to install – 230V/13 amp power
- ❖ Water supply from the mains or header tank
- ❖ Removable mixing bowl for easy cleaning
- ❖ Built-in modules for access to all working parts
- ❖ Totally enclosed in a sturdy aluminium cabinet with stainless steel legs
- ❖ The hopper holds over 25kg of milk powder and is removable for cleaning

Labour saving, cost effective,
healthy youngstock

Machines require a free flowing powder
